how it **WORKS**

SIA's elite AIM Program puts the most promising Vincennes students on the fast track to the career of their dreams by providing a highly specialized education in Computer Integrated Manufacturing plus real-world experience and compensation.

SEMESTER I - ON CAMPUS: VINCENNES

During the first semester of their freshman year, Vincennes students studying Computer Integrated Manufacturing take classes on campus and apply for the SIA AIM Program. Students will be selected based on academic success, campus involvement, and the recommendation of Vincennes faculty.

SEMESTER II - IV - ON SITE: SIA

SIA AIM students will work and take classes at the SIA Manufacturing plant, in Lafayette, IN. Two days a week, students will take classes at Purdue University's College of Technology Lafayette site, located at the SIA plant, to earn their Vincennes's Associates degree in Computer Integrated Manufacturing. Three days a week, students will apply the technologies learned in the classroom in various technical rotation assignments. This hands on approach of applying classroom knowledge on the job, is one of but a few national programs where students learn while they earn valuable real world experience and compensation.

DEGREE + EXPERIENCE = JOB

Upon successful completion of the program, SIA AIM students qualify for a fulltime position at SIA.

* Plus, after six months of full-time employment, SIA AIM graduates can continue their education at the Purdue College of Technology Lafayette SIA site, and earn a Purdue Bachelor's degree in Engineering Technology, paid for by SIA.

PARTNERS

VINCENNES
UNIVERSITY

Under the guidance of highly experienced administrators, faculty and staff members, Vincennes University students have the opportunity to pursue or advance careers in a number of industry-specific areas of expertise such as: teaching, educational administration, healthcare, physical education and wellness, graphic design, journalism, nursing, sport management, aviation, manufacturing and interior design.

PURDUE
UNIVERSITY

Founded in 1869 in West Lafayette, Indiana, the university proudly serves its state as well as the nation and the world. Academically, Purdue's role as a major research institution is supported by top-ranking disciplines in pharmacy, business, engineering, and agriculture. More than 39,000 students are enrolled here. All 50 states and 130 countries are represented. Add about 950 student organizations and Big Ten Boilermaker athletics, and you get a college atmosphere that's without rival.

SUBARU of INDIANA AUTOMOTIVE, INC.

Subaru of Indiana Automotive, Inc. (SIA), a subsidiary of Fuji Heavy Industries, Ltd., is the home of North American Subaru production. Models built at the Lafayette, Indiana plant include the Subaru Legacy, Outback, and Impreza (beginning in 2016). SIA also produces the Toyota Camry under contract with Toyota. SIA employs over 3,800 Associates, and every Associate is committed to quality, safety and environmental stewardship. For more information, visit www.subaru-sia.com.
